STATISTICS

An Official Journal of the
Institute of Mathematical Statistics

VOLUME 36

2008

CONTENTS OF VOLUME 36

Articles

AÏT-SAHALIA, YACINE. Closed-form likelihood expansions for multivariate diffusions 906–937

ANDERES, ETHAN B. AND STEIN, MICHAEL L. Estimating deformations of isotropic Gaussian random fields on the plane 719–741

ANDERSON, GREG W. AND ZEITOUNI, OFER. A CLT for regularized sample covariance matrices 2553–2576

ARIAS-CASTRO, ERY, CANDÈS, EMMANUEL J., HELGASON, HANNES AND ZEITOUNI, OFER. Searching for a trail of evidence in a maze 1726–1757

BAIR, ERIC, HASTIE, TREVOR, TIBSHIRANI, ROBERT AND PAUL, DEBASHIS. "Preconditioning" for feature selection and regression in high-dimensional problems 1595–1618

BARRON, ANDREW R., COHEN, ALBERT, DAHMEN, WOLFGANG AND DEVORE, RONALD A. Approximation and learning by greedy algorithms 64–94

BELKIN, MIKHAIL, BOUSQUET, OLIVIER AND VON LUXBURG, ULRIKE. Consistency of spectral clustering 555–586

BELLONI, ALEXANDRE AND DIDIER, GUSTAVO. On the Behrens–Fisher problem: A globally convergent algorithm and a finite-sample study of the Wald, LR and LM tests 2377–2408

BERGER, JAMES O. AND SUN, DONGCHU. Objective priors for the bivariate normal model 963–982

BICKEL, PETER. Random matrix theory: A program of the statistics and applied mathematical sciences institute (SAMSI) 2551–2552

BICKEL, PETER J. AND LEVINA, ELIZAVETA. Regularized estimation of large covariance matrices 199–227

BICKEL, PETER J. AND LEVINA, ELIZAVETA. Covariance regularization by thresholding 2577–2604

BLANCHARD, GILLES, BOUSQUET, OLIVIER AND MASSART, PASCAL. Statistical performance of support vector machines 489–531

BOUSQUET, OLIVIER, MASSART, PASCAL AND BLANCHARD, GILLES. Statistical performance of support vector machines . 489–531

BOUSQUET, OLIVIER, VON LUXBURG, ULRIKE AND BELKIN, MIKHAIL. Consistency of spectral clustering 555–586

BREIDT, F. JAY AND OPSOMER, JEAN D. Endogenous post-stratification in surveys: Classifying with a sample-fitted model 403–427

BROWN, LAWRENCE D., CAI, T. TONY, LEVINE, MICHAEL AND WANG, LIE. Effect of mean on variance function estimation in nonparametric regression 646–664

BROWN, LAWRENCE D., CAI, T. TONY AND ZHOU, HARRISON H. Robust nonparametric estimation via wavelet median regression 2055–2084
BROWN, LAWRENCE D., GEORGE, EDWARD I. AND XU, XINYI. Admissible predictive density estimation 1156–1170
BÜHLMANN, PETER AND MEIER, LUKAS. Discussion 1534–1541
CAI, T. TONY, LEVINE, MICHAEL, WANG, LIE AND BROWN, LAWRENCE D. Effect of mean on variance function estimation in nonparametric regression 646–664
CAI, T. TONY AND WANG, LIE. Adaptive variance function estimation in heteroscedastic nonparametric regression 2025–2054
CAI, T. TONY, ZHOU, HARRISON H. AND BROWN, LAWRENCE D. Robust nonparametric estimation via wavelet median regression 2055–2084
CANDÈS, EMMANUEL J., HELGASON, HANNES, ZEITOUNI, OFER AND ARIAS-CASTRO, ERY. Searching for a trail of evidence in a maze 1726–1757
CARVALHO, CARLOS M., RAJARATNAM, BALA AND MASSAM, HÉLÈNE. Flexible covariance estimation in graphical Gaussian models 2818–2849
CHAMANDY, N., WORSLEY, K. J., TAYLOR, J. AND GOSSELIN, F. Tilted Euler characteristic densities for Central Limit random fields, with application to "bubbles" 2471–2507
CHAMBAZ, ANTOINE AND ROUSSEAU, JUDITH. Bounds for Bayesian order identification with application to mixtures 938–962
CHAN, NGAI HANG AND LING, SHIQING. Residual empirical processes for long and short memory time series 2453–2470
CHATTERJEE, SNIGDHANSU, LAHIRI, PARTHA AND LI, HUILIN. Parametric bootstrap approximation to the distribution of EBLUP and related prediction intervals in linear mixed models 1221–1245
CHEN, JIANWEI AND HUANG, LI-SHAN. Analysis of variance, coefficient of determination and F-test for local polynomial regression 2085–2109
CHEN, SHU-CHUAN, LINDSAY, BRUCE G., MARKATOU, MARIANTHI, RAY, SURAJIT AND YANG, KE. Quadratic distances on probabilities: A unified foundation 983–1006
CHEN, SONG XI, GAO, JITI AND TANG, CHENG YONG. A test for model specification of diffusion processes 167–198
CHEN, XIAOHONG, HONG, HAN AND TAROZZI, ALESSANDRO. Semiparametric efficiency in GMM models with auxiliary data 808–843
CHENG, CHING-SHUI AND XU, HONGQUAN. A complementary design theory for doubling 445–457

CHENG, GUANG AND KOSOROK, MICHAEL R. Higher order semiparametric frequentist inference with the profile sampler 1786–1818
CHENG, GUANG AND KOSOROK, MICHAEL R. General frequentist properties of the posterior profile distribution 1819–1853
CLÉMENÇON, STÉPHAN, LUGOSI, GÁBOR AND VAYATIS, NICOLAS. Ranking and empirical minimization of U-statistics 844–874
COEURJOLLY, JEAN-FRANÇOIS. Hurst exponent estimation of locally self-similar Gaussian processes using sample quantiles ... 1404–1434
COHEN, ALBERT, DAHMEN, WOLFGANG, DEVORE, RONALD A. AND BARRON, ANDREW R. Approximation and learning by greedy algorithms 64–94
CUESTA-ALBERTOS, JUAN A., MATRÁN, CARLOS AND MAYO-ISCAR, AGUSTÍN. Trimming and likelihood: Robust location and dispersion estimation in the elliptical model 2284–2318
DAHMEN, WOLFGANG, DEVORE, RONALD A., BARRON, ANDREW R. AND COHEN, ALBERT. Approximation and learning by greedy algorithms 64–94
DELAIGLE, AURORE, HALL, PETER AND MEISTER, ALEXANDER. On deconvolution with repeated measurements 665–685
DEVORE, RONALD A., BARRON, ANDREW R., COHEN, ALBERT AND DAHMEN, WOLFGANG. Approximation and learning by greedy algorithms 64–94
DIDIER, GUSTAVO AND BELLONI, ALEXANDRE. On the Behrens–Fisher problem: A globally convergent algorithm and a finite-sample study of the Wald, LR and LM tests 2377–2408
DOUC, RANDAL AND MOULINES, ERIC. Limit theorems for weighted samples with applications to sequential Monte Carlo methods 2344–2376
DRTON, MATHIAS, MASSAM, HÉLÈNE AND OLKIN, INGRAM. Moments of minors of Wishart matrices 2261–2283
DÜMBGEN, LUTZ AND WALTHER, GÜNTHER. Multiscale inference about a density 1758–1785
EATON, MORRIS L., HOBERT, JAMES P., JONES, GALIN L. AND LAI, WEN-LIN. Evaluation of formal posterior distributions via Markov chain arguments 2423–2452
EDELMAN, ALAN, RAO, N. RAJ, MINGO, JAMES A. AND SPEICHER, ROLAND. Statistical eigen-inference from large Wishart matrices 2850–2885
EFROMOVICH, SAM. Adaptive estimation of and oracle inequalities for probability densities and characteristic functions 1127–1155

EL KAROUI, NOUREDDINE. Operator norm consistent estimation of large-dimensional sparse covariance matrices 2717–2756
EL KAROUI, NOUREDDINE. Spectrum estimation for large dimensional covariance matrices using random matrix theory 2757–2790
FAN, JIANQING AND FAN, YINGYING. High-dimensional classification using features annealed independence rules 2605–2637
FAN, JIANQING AND LAM, CLIFFORD. Profile-kernel likelihood inference with diverging number of parameters 2232–2260
FAN, YINGYING AND FAN, JIANQING. High-dimensional classification using features annealed independence rules 2605–2637
FANG, X. AND HEDAYAT, A. S. Locally D-optimal designs based on a class of composed models resulted from blending Emax and one-compartment models 428–444
FRYZLEWICZ, PIOTR, SAPATINAS, THEOFANIS AND SUBBA RAO, SUHASINI. Normalized least-squares estimation in time-varying ARCH models 742–786
GAO, JITI, TANG, CHENG YONG AND CHEN, SONG XI. A test for model specification of diffusion processes 167–198
GARCÍA-ESCUDERO, LUIS A., GORDALIZA, ALFONSO, MATRÁN, CARLOS AND MAYO-ISCAR, AGUSTIN. A general trimming approach to robust cluster analysis 1324–1345
GENOVESE, CHRISTOPHER AND WASSERMAN, LARRY. Adaptive confidence bands 875–905
GEORGE, EDWARD I., XU, XINYI AND BROWN, LAWRENCE D. Admissible predictive density estimation 1156–1170
GILL, RICHARD D. AND GRÜNWALD, PETER D. An algorithmic and a geometric characterization of coarsening at random 2409–2422
GORDALIZA, ALFONSO, MATRÁN, CARLOS, MAYO-ISCAR, AGUSTIN AND GARCÍA-ESCUDERO, LUIS A. A general trimming approach to robust cluster analysis 1324–1345
GOSSELIN, F., CHAMANDY, N., WORSLEY, K. J. AND TAYLOR, J. Tilted Euler characteristic densities for Central Limit random fields, with application to "bubbles" 2471–2507
GRAMA, ION AND SPOKOINY, VLADIMIR. Statistics of extremes by oracle estimation 1619–1648
GROENEBOOM, PIET, MAATHUIS, MARLOES H. AND WELLNER, JON A. Current status data with competing risks: Consistency and rates of convergence of the MLE 1031–1063
GROENEBOOM, PIET, MAATHUIS, MARLOES H. AND WELLNER, JON A. Current status data with competing risks: Limiting distribution of the MLE 1064–1089

GRÜNWALD, PETER D. AND GILL, RICHARD D. An algorithmic and a geometric characterization of coarsening at random 2409–2422
GU, ZHONGHUA, NGUYEN, THUAN, JIANG, JIMING AND RAO, J. SUNIL. Fence methods for mixed model selection 1669–1692
GUO, HONGWEN AND KOUL, HIRA L. Asymptotic inference in some heteroscedastic regression models with long memory design and errors 458–487
HALL, PETER AND JIN, JIASHUN. Properties of higher criticism under strong dependence 381–402
HALL, PETER AND LAHIRI, SOUMENDRA N. Estimation of distributions, moments and quantiles in deconvolution problems 2110–2134
HALL, PETER, MEISTER, ALEXANDER AND DELAIGLE, AURORE. On deconvolution with repeated measurements 665–685
HALL, PETER, PARK, BYEONG U. AND SAMWORTH, RICHARD J. Choice of neighbor order in nearest-neighbor classification 2135–2152
HALLIN, MARC AND PAINDAVEINE, DAVY. Optimal rank-based tests for homogeneity of scatter 1261–1298
HASTIE, TREVOR, TIBSHIRANI, ROBERT, PAUL, DEBASHIS AND BAIR, ERIC. "Preconditioning" for feature selection and regression in high-dimensional problems 1595–1618
HE, XUMING AND ZHOU, JIANHUI. Dimension reduction based on constrained canonical correlation and variable filtering 1649–1668
HEDAYAT, A. S. AND FANG, X. Locally D-optimal designs based on a class of composed models resulted from blending Emax and one-compartment models 428–444
HELGASON, HANNES, ZEITOUNI, OFER, ARIAS-CASTRO, ERY AND CANDÈS, EMMANUEL J. Searching for a trail of evidence in a maze 1726–1757
HOBERT, JAMES P., JONES, GALIN L., LAI, WEN-LIN AND EATON, MORRIS L. Evaluation of formal posterior distributions via Markov chain arguments 2423–2452
HOBERT, JAMES P. AND MARCHEV, DOBRIN. A theoretical comparison of the data augmentation, marginal augmentation and PX-DA algorithms 532–554
HOFFMANN, MARC AND REISS, MARKUS. Nonlinear estimation for linear inverse problems with error in the operator 310–336
HOFMANN, THOMAS, SCHÖLKOPF, BERNHARD AND SMOLA, ALEXANDER J. Kernel methods in machine learning 1171–1220
HONG, HAN, TAROZZI, ALESSANDRO AND CHEN, XIAOHONG. Semiparametric efficiency in GMM models with auxiliary data 808–843

HOROWITZ, JOEL L., MA, SHUANGGE AND HUANG, JIAN. Asymptotic properties of bridge estimators in sparse high-dimensional regression models 587–613
HUANG, JIAN, HOROWITZ, JOEL L. AND MA, SHUANGGE. Asymptotic properties of bridge estimators in sparse high-dimensional regression models 587–613
HUANG, JIAN AND ZHANG, CUN-HUI. The sparsity and bias of the Lasso selection in high-dimensional linear regression 1567–1594
HUANG, LI-SHAN AND CHEN, JIANWEI. Analysis of variance, coefficient of determination and F-test for local polynomial regression 2085–2109
JIANG, JIMING, RAO, J. SUNIL, GU, ZHONGHUA AND NGUYEN, THUAN. Fence methods for mixed model selection 1669–1692
JIANG, WENXIN AND TANNER, MARTIN A. Gibbs posterior for variable selection in high-dimensional classification and data mining 2207–2231
JIN, JIASHUN AND HALL, PETER. Properties of higher criticism under strong dependence 381–402
JOHNSTONE, IAIN M. Multivariate analysis and Jacobi ensembles: Largest eigenvalue, Tracy–Widom limits and rates of convergence 2638–2716
JONES, GALIN L., LAI, WEN-LIN, EATON, MORRIS L. AND HOBERT, JAMES P. Evaluation of formal posterior distributions via Markov chain arguments 2423–2452
JUDITSKY, A., RIGOLLET, P. AND TSYBAKOV, A. B. Learning by mirror averaging 2183–2206
JUPP, P. E. Data-driven Sobolev tests of uniformity on compact Riemannian manifolds 1246–1260
KOSOROK, MICHAEL R. AND CHENG, GUANG. Higher order semiparametric frequentist inference with the profile sampler 1786–1818
KOSOROK, MICHAEL R. AND CHENG, GUANG. General frequentist properties of the posterior profile distribution 1819–1853
KOUL, HIRA L. AND GUO, HONGWEN. Asymptotic inference in some heteroscedastic regression models with long memory design and errors 458–487
LAFFERTY, JOHN AND WASSERMAN, LARRY. Rodeo: Sparse, greedy nonparametric regression 28–63
LAHIRI, PARTHA, LI, HUILIN AND CHATTERJEE, SNIGDHANSU. Parametric bootstrap approximation to the distribution of EBLUP and related prediction intervals in linear mixed models 1221–1245

LAHIRI, SOUMENDRA N. AND HALL, PETER. Estimation of distributions, moments and quantiles in deconvolution problems 2110–2134

LAI, WEN-LIN, EATON, MORRIS L., HOBERT, JAMES P. AND JONES, GALIN L. Evaluation of formal posterior distributions via Markov chain arguments 2423–2452

LAM, CLIFFORD AND FAN, JIANQING. Profile-kernel likelihood inference with diverging number of parameters 2232–2260

LEONENKO, NIKOLAI, PRONZATO, LUC AND SAVANI, VIPPAL. A class of Rényi information estimators for multidimensional densities 2153–2182

LEVINA, ELIZAVETA AND BICKEL, PETER J. Regularized estimation of large covariance matrices 199–227

LEVINA, ELIZAVETA AND BICKEL, PETER J. Covariance regularization by thresholding 2577–2604

LEVINE, MICHAEL, WANG, LIE, BROWN, LAWRENCE D. AND CAI, T. TONY. Effect of mean on variance function estimation in nonparametric regression 646–664
